*When replacing the Main PCB UNIT for Europe and Turkey production before September 2016, please use ERP LOT6 INSERTION together.

Contents of these insertions are below in multiple language.

"Auto Power Off Mode

Auto Power Off Mode is available with your machine. If the machine is idle for a certain length of time, it will turn off automatically. You can change the Auto Power Off settings from the EcoLogy menu. Auto Power Off Mode is not available when your machine is connected to either a network or a telephone line.

This is because Auto Power Off Mode turns ON in default to comply with EU eco-design directive(ErP Lot6 Tier2) after production in October, 2016. (Only Russia is OFF in default) This function is available with the latest firmware and entering three spec code by Maintenance 74.
